How should I clean Laminate / Vinyl flooring?

Please take some time to read this before your start cleaning your Laminate / Vinyl floor

**Laminate/Vinyl flooring is a beautiful, low maintenance, long-lasting flooring.
There are several simple steps that you can take to keep your laminate/vinyl flooring clean
AND to ensure that you get many years of service from it.**

DO NOT USE A SQUEEGY OR SPAGETTI MOP & BUCKET OF WATER

- Do not wash your floor with a soaking cloth, or sponge mop we recommend the use of a Micro Fibre Mop or Cloth.
- Wipe up any spills immediately with an absorbent Micro Fiber Mop, dry cloth or paper towel.
- Regularly remove dust with a Micro Fibre Mop, broom or vacuum cleaner.
- Do not sand, varnish, polish or wax the floor or use steelwool as these treatments will adversely affect the floor.
- Do not use any abrasive cleaners - NO Handy Andy or "clean and shine" products.
- Do not clean grooves with a pointed metal object or steam clean it.
- Do not place pot plant drip trays directly onto the floor surface, always have these lifted off the floor to allow airflow.
- Chair legs, table legs and cupboard feet should be fitted with felt pads. Dont drag furniture on your floor.
- Dirt carried in on footwear can cause damage to ALL floor coverings. Gravel etc acts like sandpaper and causes scratches.
- Beware of pets with long sharp nails - they can also scratch your floor.

ENJOY - YOUR FLOOR
